

THE DIFFERENCE IS DEBEER *SIMPLICITY*

MM5585F MICA BLUE FINE AND
MM5564 BRIGHT GREEN BLUE

DEBEER
REFINISH

TAILORED SOLUTIONS FOR PREMIUM REFINISHING

DeBeer Refinish makes it easy for you to perfectly colour match and achieve OEM-standard repairs on both simple and complex finishes.

Mica Blue Fine and Bright Green Blue are two high quality toners that have been introduced to the DeBeer BeroBase 500 Series for even better colour-matching abilities.

Precise Colour

We understand the importance of getting a precise colour match, the first time. DeBeer has pioneered some of the most advanced colour technology to make sure you can get a perfect match as quickly and accurately as possible. The two new blue toners provide a solution that allows you to deliver OEM-standard refinish repairs.

Broader colour offering

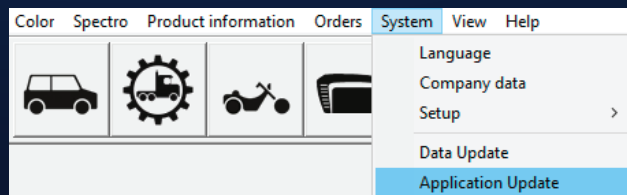

The introduction of the two toners expands our blue colour offering, improving your ability to match blue finishes. The new toners also mean you can match other colours that require these shades of blue in formulation, ensuring outstanding results your customers will appreciate.

The introduction of the MM5564 Bright Green Blue will result in the rationalisation of the MM545 Deep Blue, which is no longer available to purchase.

How to access

Please ensure that your ICRIS software is up to date. The new colour formulations with the new Mica Blue Fine and Bright Green Blue toners are available on the latest update.

To update your ICRIS software, follow the instruction below.
