NIOSH Filter Types Explained: N, R and P

Type	N - Not Oil Resistant	R - Provides some Oil Resistance*	P - Oil Resistant
95	Filters 95% of particles	Filters 95% of particles	Filters 95% of particles
99	Filters 99% of particles	Filters 99% of particles	Filters 99% of particles
100	Filters 99.97% of particles	Filters 99.97% of particles	Filters 99.97% of particles

*Time use limitations may apply.

The above values are based on NIOSH test protocols with a machine that generates a solid or oil particle size of nominally 0.3 microns.

60 Years Of Value, Quality & Performance.

For 60 years, the Louis M. Gerson Company has manufactured innovative products used all over the world. Continually developing new technologies to stay on the cutting edge of progressive product development and innovation, Gerson is committed to providing Value, Quality & Performance to our customers.

To assure the highest quality and purity of products as well as user value, all manufacturing in our U.S. facility is automated, utilizing proprietary equipment of our own design and manufacture. Gerson is a prime manufacturer of its principle products, assuring that each product is produced to our unique and exacting specifications. To remain globally competitive, we also utilize overseas assembly operations, again, using Gerson-owned and designed equipment.

From air-purifying respirators, to liquid filters for cleaning paints and solvents, to adhesively-treated cleaning or tack cloths for removal of surface particulates, each Gerson® product has been engineered and manufactured to provide top Value, Quality & Performance.
