SAFETY WARNINGS

WARNING

This symbol is found on all of the SOPs included in this manual, as well as the product packaging for Mirka abrasives. Specific requirements for personal protective equipment (PPE) are presented in many different OSHA standards, published in 29 CFR.

Wear appropriate eye and face protection and ensure that the selected form of protection is appropriate to the work being performed and properly fits each worker exposed to the hazard.

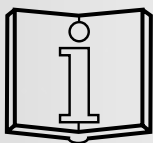

Use gloves specifically designed for the hazards and tasks found in the workplace. The nature of the hazard and the operation involved will affect the selection of gloves.

If engineering and work practice controls do not lower employee exposure to workplace noise to acceptable levels, employees must wear appropriate hearing protection.

Selecting the right respirator requires an assessment of all the workplace operations, processes or environments that may create a respiratory hazard.

Read and follow all instructions contained in Technical Data Sheets and User Manuals.

The User is responsible for determining whether the Mirka product is fit for a particular purpose and suitable for the User's application. The User is also responsible for complying with any applicable safety and health-related regulations and taking any safety and health-related precautions when using Mirka products. This includes, but is not limited to: wearing safety glasses, facemasks, gloves, and protective clothing, if necessary; following instructions and warning labels; and operating Mirka products safely including at safe operating speeds. By User's purchase or use of Mirka products, User acknowledges, represents, and warrants that User will: (a) comply with the foregoing; (b) assume all risks in connection with the use of Mirka products; and (c) read and understand the Mirka Warranty Policy.

Innovative solutions for automotive refinishing.

Mirka Abrasives provides a full range of solutions from surface preparation through paint and clearcoat polishing.

Mirka is an internationally recognized leader in the manufacturing of coated, nonwoven and specialty abrasives for the automotive refinishing market.

Designed for today's technologically advanced coatings, Mirka has solutions for your most demanding jobs.

For over 25 years, Mirka Abrasives, Inc. has continually raised the performance bar through the development of innovative products and solutions for collision centers. This Automotive Refinishing Guide will highlight Mirka's abrasive and accessory product offering in the following format:

PERFORMANCE: Good / Better / Best / Unique

Smart Cart System Solutions

The Mirka Smart Cart is the perfect solution to keep all your abrasives, tools, and dust extraction at one place in an integrated, dust-free sanding system.

Available in electric or pneumatic systems for body and paint repair.

SOP - Large Area Body Repair

- Repair of major dents, large scratches through painted surfaces to bare metal
- Prepare damaged area for paint. Areas are larger than 3" in diameter

1. PREP

Autonet® P80
AE24105080

MR-608 Sander (vac converted)
916GV15 Backup Pad

Sand an area approximately 2"-3" beyond the damaged area using Autonet® P80 grit abrasive discs and an MR-608 random-orbital sander to expose bare metal. Featheredge the paint inward toward the repair area.

Use an MV-912 dust extractor or other dust collection system when sanding. The MR-608 sander can be converted for vacuum use with the MR-6CVC kit.

2. FILL

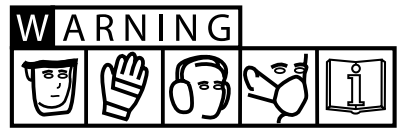

(Body Filler)

Apply filler in thin layers and spread smoothly over the entire repair area. Do not apply material all at once as this can cause pinholes. To ensure best adhesion, apply firm pressure with spreader when applying. Follow manufacturer's instructions for proper mixing ratios and curing times.

3. SHAPE SAND

Autonet® P80

AE-570-080

MR-38CV Orbital Sander

9193500111 Dry Guide Coat

Sand hardened filler using a MR-38CV orbital sander and Autonet® P80. Avoid creating coarse scratches outside the filled area during the initial cut. After initial shaping, apply Guide Coat to highlight the repair area. Block the repair to reveal any low areas. Additional filler may be required if excessive low spots remain. Re-apply Guide Coat.

4. FINISH SAND

Autonet® P180

AE-570-180, AE24105018

91502 Vacuum Block

MR-608 Sander (vac converted)

916GV15 Backup Pad

Using Autonet® P180 grit abrasive and a vacuum block, sand the highlighted repair area until the surface is uniform. After the repair has been shaped, featheredge and refine the straight line scratches using Autonet® P180 discs with an MR-608 sander.

SOP - Small Area Body Repair

- Repair of minor dents, scratches or hail damage
- Prepare damaged area for paint. Areas are 3" or less in diameter

1. PREP

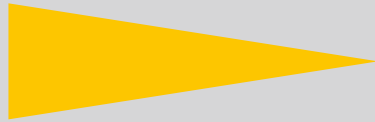

Autonet® P80
AE-203-080

MR-350 Sander (vac converted)
913GV Backup Pad

Sand an area approximately 2-3" beyond the damaged area using Autonet® P80 grit abrasive discs and an MR-350 random-orbital sander to expose bare metal. Featheredge the paint inward toward the repair area.

Use an MV-912 dust extractor or other dust collection system when sanding. The MR-350 finishing sander can be converted for vacuum use with the MR-3CVC kit.

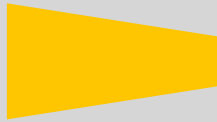

2. FILL

(Body Filler)

Apply filler in thin layers and spread smoothly over the entire repair area. Do not apply material all at once as this can cause pinholes. To ensure best adhesion, apply firm pressure with spreader when applying. Follow manufacturer's instructions for proper mixing ratios and curing times.

SOP - Replacement Part Preparation

- Prepare surface for primer or sealer application
- Remove surface defects in existing coating

E-COAT

Replacement metal panels are supplied with a hard "e-coat" primer for corrosion protection.

This material should be sealed for proper topcoat adhesion and chip resistance.

Light sanding/scuffing of the parts is required prior to sealing. Avoid sanding through the e-coat to bare metal.

Follow paint manufacturer's recommendations for specific instructions for panel preparation.

PREP

Gold Soft P320

23-645-320

MRP-650CV Sander

916GV48 Backup Pad

Mirlon Total® Red Scuff Pad

Sand panel using Gold Soft P320 grit abrasive using moderate speed.

Use an MV-912 dust extractor or other dust collection system when sanding.

Scuff edges or contours using a Mirlon Total® Red scuff pad #18-118-447.

Follow paint manufacturer's recommended procedure for topcoating.

*requires use of 1066F Interface Pad

FLEXIBLE PARTS

While replacement plastic parts (bumper covers, facias, body-side moldings, etc.) most often are delivered with a factory-applied primer, this coating may not be suitable for topcoat adhesion and solvent resistance.

Follow paint manufacturer's recommendations for specific instructions for panel preparation.

PREP

Mirlon Total® Gray

18-118-448 (UF)

Scuff replacement plastic panels using Mirlon Total® Gray scuff pad and the appropriate cleaner designated by the paint manufacturer.

Follow paint manufacturer's recommended procedure for topcoating.

SCUFF PADS

Mirlon Total® 4-1/2" x 9" Scuff Pad

18-111-448 (Gray)	Ultra Fine	N/A	20	\$25.00	\$22.50

SOP - Panel Blending

- Refinement of all sanded area transitions
- Prepare entire surface that will receive basecoat and clearcoat

In most cases, application of clearcoat to the entire panel is the only procedure approved for a Warranted Repair.

As blending the clearcoat within the panel requires the thickness of the clearcoat to be reduced at the edge, it may become visible if polished too aggressively, or after extended exposure to weather.

Follow paint manufacturer's recommendations for specific instructions for panel blending.

1. SAND

Microstar® P800 or P1000
 FM-611-800, FM-611-1000
MRP-650CV Sander
916GV48 Backup Pad
1066F Interface Pad

Sand panel using Microstar™ P800 grit or finer abrasive using moderate speed.

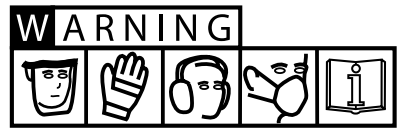

For solvent-based systems, use P800 grit. For waterborne systems, use P1000.

Use an MV-912 dust extractor or other dust collection system when sanding.

6" GRIP DISCS

2. SCUFF

Mirlon Total® Gray
18-118-448 (UF)

Use a Mirlon Total® Ultra Fine Gray scuff pad for surface contours, door handle recesses and other areas that cannot be reached by machine sanding.

3. CLEAN

(Cleaner)

Using the final cleaning solution recommended by the paint manufacturer, clean the sanded area and apply adhesion promoter if required.
Follow paint manufacturer's recommended procedure for blending.

SCUFF PADS

Mirlon Total® 4-1/2" x 9" Scuff Pad

	Grit	Wt.	Qty Per Pkg	List Price/Pkg	Shop Price/Pkg
18-118-448 (Gray)	Ultra Fine (1500)	N/A	25	\$26.00	\$23.40

1066F	Grip Faced Foam Interface Pad	6" dia. x 3/8"	5	\$54.00	\$48.60

SOP - Clearcoat Large Area Finishing

- Remove dirt nibs, runs or sags in clear coats
- Match original paint surface texture

1. SAND

Microstar® P1500

FM-622-1500

MR-6 Sander

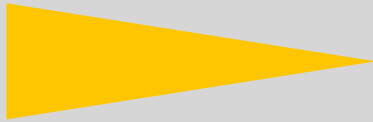

106SG Backup Pad

1066F Interface Pad

Sand with 1500 grit (dry) using moderate speed.

The clear should “powder” when sanding. If you can not produce dust, then it is not dry enough to sand. Sanding too early risks producing “pills” which will damage the surface.

Microstar was designed to remove runs, dust nibs, excess orange peel or other surface defects in painted surfaces or gelcoat prior to polishing.

2. FINESSE

Abralon® 3000

8A-241-3000

MR-6 Sander

106SG Backup Pad

Refine sand scratches using 3000 grit Abralon with a 50% overlap pattern (wet).

Spray the pad and surface with clean water. If too much is used, it will be evident by water “slinging” from the pad, and the abrasive will float over the surface with reduced cutting action.

3. BUFF

Polarshine® 35 PC35-1L

MPADTW-7.5-1.5 Wool Pad (7" Rotary Buffer)

Buff using PC35 compound in conjunction with a twisted wool pad (MPADTW-7.5-1.5)

Use a slow speed (1,500 rpm) to prevent "burning" the finish.

Keep the pad clean from compound build-up.

(If shop does not use twisted wool, you can substitute a lambs wool pad MPADLW-7.5)

4. POLISH

Polarshine® 10 PC10-1L

MPADBF-8 Foam Pad (7" Rotary Buffer)

Polish using PC10 with a black foam pad (MPADBF-8).

Use a slow speed (1,500 rpm) to prevent "burning" the finish.

9133 Interface Pad

Sand with 1500 grit (dry) using moderate speed.

The clear should “powder” when sanding. If you can not produce dust, then it is not dry enough to sand. Sanding too early risks producing “pills” which will damage the surface.

Microstar was designed to remove runs, dust nibs, excess orange peel or other surface defects in painted surfaces or gelcoat prior to polishing.

2. FINESSE

Abralon® 3000

8A-203-3000

MR-350 Sander

913G Backup Pad

Refine sand scratches using 3000 grit Abralon with a 50% overlap pattern (wet).

Spray the pad and surface with clean water. If too much is used, it will be evident by water “slinging” from the pad, and the abrasive will float over the surface with reduced cutting action.

3" GRIP DISCS

Microstar® 3" Film-Backed Grip Disc

3. BUFF

Polarshine® 35 PC35-1L

MPADTW-3 Wool Pad
MR-30 Rotary Palm Buffer

Buff using PC35 compound in conjunction with a twisted wool pad (MPADTW-3)

Use a moderate speed to prevent "burning" the finish.

Keep the pad clean from compound build-up.

(If shop does not use twisted wool, you can substitute a lambs wool pad MPADLW-3)

4. POLISH

Polarshine® 10 PC10-1L

MPADBF-3.25 Black Foam Pad
MR-30 Rotary Palm Buffer

Polish using PC10 with a black foam pad (MPADBF-3.25).

Use a moderate speed to prevent "burning" the finish.

SOP - Clearcoat Spot Repair

- Remove dirt nibs in clear coats
- Match original paint surface texture

1. SAND

Polarstar® SR 5 Micron
SR-301-5A

MROS150 Sander
1125S-R Backup Pad

Sand with 5 micron grit with a small amount of water as a lubricant using moderate speed.

Sand until the defect is just even, or slightly above the surrounding surface area. Sanding too long will produce "coin marks" in the finish.

2. BUFF

Polarshine® 10
PC10-1L

MROP-312TH Random Orbital Polisher
MPADOF-3.25
913G Backup Pad

Buff using PC10 compound in conjunction with an orange foam pad (MPADOF-3.25)

Use a moderate speed to prevent "burning" the finish.

Keep the pad clean from compound build-up.

Product Overview

Abranet® HD Abrasives

- Excellent durability – especially on the toughest applications.
- Designed for performance in both vacuum and conventional sanding.
- Patented abrasive material resists clogging.
- May be used for grinding, cleaning and deburring.

**Available in 6" and 8" diameter grip discs, and 2-3/4" grip rolls.
Grit range: P40, P60, P80.**

Autonet® Abrasives

- Net sanding discs outlast conventional paper and film discs.
- Aggressive, high cut rate to meet shop's demanding needs.
- Offers vacuum efficiency approaching 95% but can also be used without vacuum for conventional sanding operations.

**Available in 2-3/4" grip rolls and 3", 6" diameter grip discs.
Grit range: P80-P800.**

Q.Silver® Abrasive Discs

- Excellent versatility from metal to clearcoat sanding.
- Aluminum Oxide grain from P80-P400, Silicon Carbide from P500-P1500.
- Premium abrasive product with fast cutting and advanced non-loading properties, suitable for wet and dry sanding.

**Available in discs, 2-3/4" rolls and filesheets.
Grit range: P80 - P1500.**

Coarse Cut Abrasives

- Aggressive and fast cutting.
- Heavy weight paper for demanding stock removal applications.
- Highly flexible with superior grain retention and edge wear.

**Available in discs and filesheets.
Grit range: P40-P150.**

Bulldog Gold Abrasives

- Suitable for heavy stock removal through finishing.
- Heat-treated aluminum oxide grain delivers a fast, long lasting cut.
- Special stearate coating is used to maximize resistance to clogging and loading.

**Available in discs, sheets and rolls.
Grit range: P36-P800.**

Basecut® Abrasives

- Economical solution.
- Full grit range (P40-P1500).
- Aggressive initial cut and long life.
- Resists clogging and loading.

**Available in discs, sheets and rolls.
Grit range: P40-P1500.**

Mirlon and Mirlon Total® Nonwoven Abrasives

- Aggressive cut rate with very consistent scratch pattern.
- Flexible abrasive pad ideal for use on contoured shapes, surfaces, and intricate details.
- Designed for fine sanding and pre-finishing.

**Available in 4-1/2" x 9", 6" x 9" pads and rolls.
Grit range: Very Fine, Ultra Fine and Micro Fine* (*Total only).**

Microstar® Film-Backed Grip Discs

- Provides uniform scratch pattern that is easily removed when polishing
- Modified stearate coating for unequalled resistance to loading
- Film backing with aluminum oxide grain for even, consistent finish
- Hook and Loop (Grip) attachment

**Available in 3" and 6" diameter grip discs.
Grit range: P800-P1500.**

Polarstar® Film Discs

- Fast-cutting abrasive improves cycle times for clearcoat finishing.
- Produces a fine, consistent surface finish.
- Excellent durability, lasts long with excellent resistance to clogging.
- Suitable for wet and dry sanding.

**Available in 3" and 6" diameter grip discs and 1/4" SR finessing discs.
Grit range: P600 - P1500.**

Abralon® Foam Backed Abrasive Discs

- Grip-backed foam discs with abrasive-coated woven fabric face.
- Foam discs work especially well when sanding curved and contoured surfaces, corners and edges.
- Excellent for pre-buff surface preparation.

**Available in 3" and 6" diameter grip discs.
Grit range: 1000, 2000, 3000, 4000.**

Waterproof Sheets

- Waterproof product with flexible resin bond.
- Consistent and precise manufacturing process provides fine scratch pattern for improved finish.
- Designed for wet sanding by hand.

**Available in 9" x 11", 5-1/2" x 9" sheets and 1-1/4" finessing discs.
Grit range: P220-P2500.**

Polarshine® Polishing Products

- Polishing compounds for removal of scratches from P1200 and finer.
- Permanently removes sanding marks and swirl marks while rapidly producing a high gloss finish.
- Products can be used by hand or machine application.

Includes compounds, polishes and pads.

Grinding Products

Includes:

- 3" Cutoff Wheels
- 2" and 3" Mini-Grinding and Surface Conditioning Discs
- 5" and 7" Resin Fiber Discs
- 3" and 5" Trim-Kut® Grinding Discs

Tools and Accessories

- Mirka finishing sanders are effective and durable tools for professional use, offering long life and superior reliability.
- Precision molded foam pads are balanced for 12,000 rpm use.
- Interface pads utilize grip attachment for use with mesh abrasives.

Available in 1.25", 3" and 6" diameter and 3" x 8".

Commitment to quality

MIRKA WARRANTY POLICY

EFFECTIVE: February 3, 2014

Warranty

Mirka Abrasives, Inc. (“Mirka”) warrants that the following Mirka products will be free from defects in material or workmanship from the date of purchase for the time period indicated:

- a. Pneumatic and electric tools (except dust extractors): 2 years *
- b. All other tools and products: 1 year

* By registering a pneumatic or electric tool within 30 days of purchase at www.mirka.com/warranty-registration, Mirka will warrant the product for an additional one year.

Terms and Conditions

The purchase of any Mirka product will constitute and be deemed to be acceptance of and agreement to the Mirka Warranty Policy (“Policy”) by the purchaser and/or user (collectively “User”) of any Mirka product.

The Policy shall not apply to:

- Normal wear and tear; or
- Product failure or damages caused by:
 - Subsequent modification of the Mirka product;
 - Repairs attempted or made on the Mirka product other than by Mirka;
 - Misuse, abuse or neglect;
 - Careless or unsafe handling;
 - Failure to follow any applicable instructions for the Mirka product; or
 - Anything other than defects in material or workmanship.

Mirka’s sole obligation under this Policy shall be, at Mirka’s option, to: (1) repair or replace any Mirka product that is defective in material or workmanship; or (2) refund the purchase price of the Mirka product that is defective in material or workmanship. Repairs during the warranty period do not lengthen or renew the original warranty period of the product.

The User is responsible for determining whether the Mirka product is fit for a particular purpose and suitable for the User’s application. The User is also responsible for complying with any applicable safety and health-related regulations and taking any safety and health-related precautions when using Mirka products. This includes, but is not limited to: wearing safety glasses, facemasks, gloves, and protective clothing, if necessary; following instructions and warning labels; and operating Mirka products safely including at safe operating speeds. By User’s purchase or use of Mirka products, User acknowledges, represents, and warrants that User will: (a) comply with the foregoing; and (b) assume all risks in connection with the use of Mirka products.

No agent, representative, employee, distributor or dealer of Mirka is authorized to modify this Policy or to issue any warranty regarding any Mirka products.

Any civil action against Mirka relating to or arising out of the sale of Mirka products shall be commenced within one (1) year of the date the cause of action accrued or otherwise the cause of action shall be barred.

Disclaimer

EXCEPT FOR THE PROVISIONS OF THIS “WARRANTY,” MIRKA EXPRESSLY DISCLAIMS ALL GUARANTEES AND/OR WARRANTIES, EXPRESSED OR IMPLIED, INCLUDING THE WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE AND ANY IMPLIED WARRANTY ARISING OUT OF A COURSE OF DEALING, CUSTOM OR USAGE OF TRADE.

Limitation on Liability

MIRKA’S LIABILITY FOR ANY LOSS OR DAMAGE ARISING OUT OF OR RESULTING FROM ANY BREACH OR DEFAULT BY MIRKA IN CONNECTION WITH THE SALE OF MIRKA PRODUCTS HEREUNDER SHALL NOT EXCEED THE PURCHASE PRICE THEREOF, REGARDLESS OF WHETHER SUCH LIABILITY ARISES IN CONTRACT, TORT (INCLUDING, WITHOUT LIMITATION, STRICT LIABILITY) OR OTHERWISE.

IN NO EVENT SHALL MIRKA BE LIABLE FOR LOSS OR DAMAGE ARISING FROM THE MIRKA PRODUCT, WHETHER DIRECT, INDIRECT, SPECIAL, INCIDENTAL, OR CONSEQUENTIAL DAMAGES OF ANY KIND REGARDLESS OF THE LEGAL THEORY ASSERTED, INCLUDING, WITHOUT LIMITATION, WARRANTY, CONTRACT, NEGLIGENCE OR STRICT LIABILITY.

Submitting a Warranty Claim

To submit a warranty repair claim, Users must contact their Mirka dealer or Mirka customer support. Tools returned for warranty repair must be accompanied by a valid purchase receipt or invoice.
