BearTex®

BEARTEX NON-WOVEN ABRASIVES

The non-woven structure is a network of nylon fibers, impregnated with abrasive grains and bonded with a phenolic resin. BearTex® hand pads and roll have been specifically developed for edges, contours and curves and are available in a variety of grades, ideal for applications including cleaning, removing rust, polishing and finishing. Their flexibility provides a more uniform and consistent result, without damaging painted and clearcoat surfaces.

BEARTEX® HAND PADS 150 x 230mm

DESCRIPTION	USAGE	COLOUR	GRIT	PK QTY	BOX QTY	ART. NO.
